JOB OFFER

AUTOMATION SPECIALIST

Attractive remuneration based on experience

You are an experienced and skilled Automation Specialist willing to join a dynamic, devoted and motivated team in the fields of controls, industrial computing, new technologies and IT network for the renewable energy sector.

✓ About us

We are professionals who are passionate about renewable energy and the exciting opportunities it offers. We are determined to provide innovative and efficient solutions that exceed our clients' highest expectations.

Ganex invests in outstanding people of diverse backgrounds and talents and empowers them to achieve more than they could elsewhere. Our work combines advice with action and integrity which is why we are recognized as our clients' trusted partner.

For over two decades, we have demonstrated an insatiable curiosity and desire to continuously improve. Ganex has multiple offices in Canada and has recently opened a US office to better serve our clients.

✓ Candidate profile

You will provide an optimal technical support and solution to our customers by designing, investigating, managing, communicating and resolving automated process problems. To ensure our organisation success, you will use your ability to organize and manage your time effectively. You will demonstrate initiative, self-reliance and strong communication skills.

✓ Your role

- Carry out SCADA and Automation projects at all stages (evaluation, development, installation, commissioning, maintenance and optimization);
- Oversee projects scope of work to ensure the solutions are adapted and respect the specifications;
- Produce or review drawings and documentation (point lists, operator manual, etc.);
- Program and configure various data concentrators and protocol gateways;
- Provide internal or external training when required;
- Develop and optimize Human-Machine interfaces (HMI)
- Occasionally support the Operation and Maintenance activities of our clients, especially with Tier 2 and 3 investigation and repair.

✔ What we are looking for

Must Have:

- Bachelor degree in Electrical or Computer Engineering or any diploma with relevant experience;
- 3 years experience in similar role;
- Proven experience as an Automation Integrator, ideally with a focus on SCADA systems;
- Proficient in AutoCAD or similar design software;
- Strong technical understanding of SCADA hardware (PLCs, RTUs, Gateways) and software (HMIs);
- Experience with Ignition;
- Experience with communication protocols (Modbus, DNP3, IEC 61850);
- Willingness to travel to different project locations, as needed;
- Valid driver license.

Nice to Have:

- Experience or ability in Project Management;
- Good knowledge of IT in general (database, security, network).

✔ What we offer

- A permanent full-time position in a dynamic team and a friendly working atmosphere;
- An attractive remuneration based on experience;
- Paid time off subject to eligibility, such as vacation, sick and bereavement;
- Benefits, subject to elections and eligibility: Medical, Disability, Life insurance and Defined Contribution Retirement Plan.
